

MuteBoard 3 Product Data

Description: MuteBoard 3 is an ultra thin, soundproofing solution to attenuate airborne noise when looking for an upgrade to the existing partition wall. The 6mm Closed cell foam will reduce the vibrations from transferring into the plasterboard and the mass loaded vinyl will reduce the airborne sound transmission.

Dimensions: 24mm x 1.2m x 1.2m
Sheet Size: 1.44 m²
Mass: 20 kg/m²
Sheet Weight: 29 kg

Features and Benefits: Can be applied direct to brick/block walls when space is at a premium.
Tapered edge.
Plasterboard finish ready for skim/plaster layer.
For reducing low level airborne noise, most commonly used internally on stud walls to yield best results.
Great as an layer is a system as well.
Works great in combination with Tecsound SY70.
