

# MuteBoard 4 Product Data

**Description:** MuteBoard 4 is a thin, high performing solution to attenuate airborne noise through an existing or new partition wall. It is a four-ply material which comprises of two dense layers of Mass Loaded Vinyl, a 6mm Closed Cell PE foam and 15mm Acoustic Plasterboard - ultimately resulting in a breakdown of acoustic materials for the best reduction.

---

**Dimensions:** 27mm x 1.2m x 1.2m  
**Sheet Size:** 1.44 m<sup>2</sup>  
**Mass:** 25.5 kg/m<sup>2</sup>  
**Sheet Weight:** 37 kg

---

**Features and benefits:** Can be applied direct to brick/block walls when space is at a premium.  
Tapered edge.  
Plasterboard finish ready for skim/plaster layer.  
For reducing medium level airborne noise, most commonly used internally on stud walls to yield best results.  
Excels as an all in 1 board when applied to a stud frame.  
4 layer product sold a single board for ease of installation.
