

# MuteClip Channel Product Data

**Description:** MuteClip Channel is only compatible with our MuteClip, the reason for this is that the design maintains a return lip to hold substantially more weight as the MuteClip clasps onto this - it cannot be used as a resilient channel. The design also includes two indentations along the profile to provide the channel with further strength.

---

**Dimensions:** 22.25mm x 63mm x 1.85m

**Weight:** 500g

---

**Features and Benefits:** Engineered and tested for use with the MuteClip systems.  
Returned lip.  
Strengthened profiles.  
Not to be used as a resilient channel.
