

MuteClip LP Product Data

Description: MuteClip LP (Low Profile) is unique in its design with its dual density rubber polymers that are designed and assembled to improve noise reduction over a broad range of frequencies whilst remaining stable and consistent with each MuteClip LP. The adopted low profile helps to reduce the loss of room height whilst never compromising in performance.

Dimensions: 50mm x 105mm x 74mm

Unit Weight: 174 g

Maximum Load: 16 kg (36 lb) per each MuteClip

Features and Benefits: Dual density rubber isolator.
Low profile design to reduce loss of room height
Dramatically reduces airborne and impact noise as a high performing, slimline acoustic system.
Can be used on metal, wooden, brick and concrete structures.
Reduced points of contact to help de-couple ceiling and wall systems.
Significantly improves sound control in both high and low frequencies
Significant improvement over standard resilient bars in both performance and fitting.

Performance:

Ceiling	$D_{nT,w} + C_{tr} = 54 \text{ dB}$
	$L_{nT,w} = 53 \text{ dB}$

*Performance will vary with different structural make-up.
Please see performance data for examples.*
