

MuteStop™ Product Data

Description: MuteStop™ reduces impact noise experienced with weight machines, without taking apart the apparatus and re-assembling. As weights are dropped during exercise, a large amount of impact is transferred through the machine and into the structure, as well as the impact of weights creating a large amount of surrounding airborne noise. Each MuteStop™ has a specific density to help improve performance, depending on the weight being dropped - perfect for soundproofing your gym.

Dimensions: 65mm x 12mm x 21mm (diameter of the hole)
Material: Versatile Polyurethane Material
Density: 3 Varying Densities

Features and benefits: Reduces the vibrations transferred into the floor.
Dual density solution.
Spring and damping characteristics.
Interlocking groove for ease of installation to the guide shaft.
Comes in sets of 4.

0 - 100kg = Brown on Red
100 - 175kg = Red on Grey
+ 175kg = Grey on Grey
